Education

University of Maryland **College Park, MD**
Bachelor of Science, Information Science **May 2025**
Dean's List: Fall 2023, Fall 2024, Spring 2025

Skills and Interests

Programming Languages: C#, Java, JavaScript, Python, R, SQL
Web Technologies: HTML, CSS
Cloud & Security: Microsoft Azure, Azure Functions, Microsoft Intune, Microsoft Purview, CrowdStrike Falcon
Data & Platforms: Oracle (ERD, schema normalization), .NET 8, Git, Jupyter, Windows PowerShell

Professional Experience

CPower Energy **Baltimore, MD**
Cloud Architect Intern **June 2025 – August 2025**

- Automated data classification, labeling, and policy enforcement in Microsoft Purview and Exchange Online, strengthening governance, compliance, and audit readiness.
- Developed PowerShell and Azure Function workflows for mailbox retention, litigation holds, and compliance audits, reducing manual effort by 100% and ensuring regulatory alignment.
- Engineered automated endpoint compliance monitoring using Intune and CrowdStrike APIs; scheduled Azure Functions to trigger alerts and reports that closed security gaps across workstations and servers.
- Designed and documented an Entity Relationship Diagram (ERD) to model legacy contact and drop-item data, guiding creation and normalization of Oracle database tables.
- Architected C#/.NET 8 data access layers and Azure Functions to ingest, synchronize, and process contact and drop-item records from Oracle for both initial and incremental loads.
- Deployed compliance checks comparing CrowdStrike Windows Sensor coverage across Intune-enrolled devices and servers, identifying discrepancies and inactive devices.
- Leveraged Microsoft 365 Copilot and GitHub Copilot to accelerate PowerShell and C# development, improve code quality, and standardize documentation.

Anne Arundel County Quiet Waters Ice Rink **Annapolis, MD**
Manager **October 2018 -March 2025**

- Oversaw daily operations for a 25-person team; coordinated scheduling, cash handling, and customer service to maintain a safe, efficient facility.

Anchor Aquatics **Annapolis, MD**
Supervisor **May 2023 – September 2023**

- Trained and supervised lifeguards; enforced safety protocols and improved incident response readiness through recurring drills.

Academic Projects

Object-Oriented Programming for Information Science, University of Maryland **College Park, MD**
Finance Tracker Project **January - May 2024**

- Fabricated a 10,000-row relational dataset; reverse-engineered and maintained ERDs; wrote complex SQL queries for analysis and reporting.

Network Security Project, University of Maryland **College Park, MD**
Basic Firewall Implementation **January - May 2024**

- Designed a simple packet-filtering firewall in Python to monitor and filter network traffic based on rules and source IPs.

Database Design and Modeling, University of Maryland **College Park, MD**
Campaign Finance Expenditures Dataset **January - May 2024**

- Built an OOP-based personal finance system (transactions, budgets, reports) with JSON persistence and period reporting.

Professional Organizations

Member, IEEE **September 2024 – Present**
Member, ACM **September 2024 – Present**
